

A photograph of a large warehouse interior. The ceiling is high with exposed metal trusses and a corrugated metal roof. The floor is a smooth, grey concrete. On the left and right sides, there are tall, orange metal shelving units. These shelves are stocked with various construction materials. On the left, there are stacks of long, thin metal rods or pipes. On the right, there are stacks of lumber, including plywood and solid wood planks. In the center of the warehouse, there are more stacks of materials, including what looks like insulation or foam board. The lighting is bright, coming from overhead industrial lights.
